Current Microbiology
An International Journal
© Springer-Verlag New York Inc. 1995

Acetobacterium woodii, H_2 as energy source for mixotrophic acetogenesis by, 245
ADH1 gene, of *Saccharomyces cerevisiae*, ABF1 transcriptional control of, 163
Aerobic nitrogen fixation, in *Cyanothece* sp. BH68K mutants, analysis of defect in, 174
Aeromonas hydrophila, *apl*-1 gene encoding lipase and phospholipase C activity identified from, 28
Agaricus bisporus
  purification and characterization of glutamine synthetase from, 108
  regulation of nitrogen-metabolizing enzymes in, 345
Akinete differentiation, in *Anabaena azollae*, 265
Aldose reductase activity induction, in *Candida guilliermondii*, catabolite repression of, 239
α-acetolactate synthase, from *Leuconostoc mesenteroides* subsp. *cermoris*, purification and characterization of, 316
Alternan, rapid screening method for isolating mutants producing high ratio of dextran to, 19
Amino acid sequence, of *Nitrosomonas europaea* cytochrome *c*-552, 1
Anagaena azollae, akinete differentiation in, 265
apl-1 gene, cloning, characterization, sequencing, and mutagenesis of, 28
Archaebacteria, related to *Thermococcus*, isolation and characterization of, 186
Aspergillus niger, purification and characterization of invertase from, 80
Autonomously replicating sequence binding factor 1 (ABF1), transcriptional control of *S. cerevisiae ADH1* gene by, 163

Bacillus cereus, oleic acid transformations by strains of, 62
Bacillus genus, photoreactivation in, 361
Bacillus megaterium, behavior of intracellular serine proteinase in nongrowing and growing populations of, 39
Bacillus sphaericus, *ssp* genes and spore osmotolerance in, 228
Bacillus subtilis (natto) No. 16, molecular cloning and nucleotide sequence of 90k serine protease gene *hspK* from, 340
Bacillus thuringiensis, *ssp* genes and spore osmotolerance in, 228
Bacillus thuringiensis var. *kurstaki* spores, correlation between crystal production and alkaline activation of, 301
Bacteriophage, of bovine ruminal acetogen, isolation and characterization of, 336
Bacteroides fragilis, detected by PCR amplification of neuraminidase gene of, 215
Bifidobacterium species
  characterization of F6PPKs purified from, 49
  effect of conjugated bile salts on, 23
Bovine ruminal acetogen, isolation and characterization of temperate bacteriophage from, 336
Brucella species, effect of iron on production of 2,3-dihydroxybenzoic acid by, 291

Caecomyces communis, location of glycosidases and xylanase in, 224
Campylobacter coli, mutagenesis of with integrational plasmid vector, 92
Candida guilliermondii, catabolite repression of aldose reductase activity induction and mixed hemicellulosic sugar use in, 239
Carnobacterium divergens, differentiation of, by numerical analysis of total soluble cell protein patterns and DNA–DNA hybridizations of, 77
Carnobacterium piscicola, differentiation of, by numerical analysis of total soluble cell protein patterns and DNA–DNA hybridizations of, 77
Carotenogenesis, in *Mucor rouxii*, environmental and developmental regulation of, 141
cat gene, construction of integrable plasmid for generating transcriptional fusion to, 92
cbbF genes, from *Alcaligenes eutrophus*, fructose 1,6-bisphosphatase (FBPase) and sedoheptulose-1,7-bisphosphatase encoded by, 53
Cell protein profiles, of *Streptomyces aureofaciens*, effect of benzyl thiocyanate on, 84
Cellobiose, growth of *Clostridium thermocellum* in, 210
Chitinolytic activity, of *Piromyces communis* OTS1, 206
Class 5 protein, identification of bactericidal antibodies to, on *Neisseria meningitidis* outer membrane, 146
Clostridium thermocellum, growth of, in continuous culture, 210
Cold shock response, in *Thiobacillus ferrooxidans* strains, 10
Cold stress protein, intracellular serine proteinase behaves as, in nongrowing *Bacillus megaterium*, 39
Conjugated bile salts, effect on *Bifidobacterium* species, 23
Cyanothece sp. BH68K mutants, analysis of aerobic and anaerobic nitrogenase activity of, 174
Cyanothece strains, distribution and homology of plasmids in, 169
Cytochrome *c*-552, of *Nitrosomonas europaea*, amino acid sequence of, 1

Deep-Sea Hydrothermal Guaymas Basin, taxonomic characterization of isolates from, 186
Dextran, rapid screening method for isolating mutants producing high ratio of alternan to, 19
2,3-Dihydroxybenzoic acid, effect of iron on *Brucella* species production of, 291
DNA–DNA hybridization, differentiation of *Carnobacterium* spp. by, 77
DNA homology, differentiation of ruminal and human *Streptococcus bovis* strains by, 294

Electrophoresis, identification of esterases and lactate- and L-malate dehydrogenases from *Flavobacterium* species of, 351
Endogenous plasmids, in *Synechococcus* sp. strain PCC 7002, salinity-dependent copy number change of, 357
Enzyme-linked immunosorbent assay (ELISA), extracellular proteinase of *P. fragi* detected by, 180
Erythrocytes, hemolytic activity of Group B streptococcus depends on bacterial contact with, 5
Esterases, from *Flavobacterium* species, electrophoretic patterns of, 351
Eubacterium limosum, H_2 as energy source for mixotrophic acetogenesis by, 245
Ewingella americana, from mollusks, isolation of, 287
Exopolysaccharides, from *Sphingomonas paucimobilis*-GS1, nutritional requirements and precursor-forming enzymes of, 234

Fluorescence microscopy, location of glycosidases and xylanase in anaerobic gut fungi determined by, 224
Fructose 6 phosphate phosphoketolases (F6PPKs), purified from *Bifidobacterium* species, characterization of, 49
Fructose-1,6-bisphosphate (FBPase), encoded by *cbbF* genes from *Alcaligenes eutrophus*, 55

Gene transfer system, for *Cyanothece* spp., role of plasmids in, 169
Genetic transfer studies, effect of salinity on moderate halophiles in, 365
Glutamine synthetase (GS)
  effect of substrate type used for *A. bisporus* growth on, 345
  from *Agaricus bisporus*, purification and characterization of, 108
  from *Nocardia asteroides*, purification and properties of, 193

Glycerol, effect on spiramycin production and valine catabolism in *Streptomyces ambofaciens*, 304
Glycosidases, in anaerobic gut fungi, location by fluorescence microscopy of, 224
Group B streptococcus, role of erythrocyte–bacteria contact on hemolytic activity of, 5

Halophilic bacteria
effect of salinity on susceptibility to antimicrobials of, 365
use of protein profiles to characterize, 158
Heat shock proteins, of *Legionella pneumophila*, 332
Heat shock response, in *Thiobacillus ferrooxidans* strains, 10
Heat stress protein, intracellular serine proteinase behaves as, in nongrowing *Bacillus megaterium*, 39
Hemolytic activity, of group B streptococcus depends on erythrocyte–bacteria contact, 5
Histidine decarboxylase production, by *Lactobacillus hilgardii*, effect of organic acids on, 15
hspK gene, from *Bacillus subtilis (natto)* No. 16, cloning and sequencing of, 340
Human leukocytes, role of reactive oxygen species generated by in killing *Pseudomonas aeruginosa*, 124
Hydrogenases, in N_2-fixing *Nostoc* sp. strain PCC 73102, immunological characterization of, 102

Intracellular serine proteinase, behaves as heat-stress protein in nongrowing and growing *Bacillus megaterium*, 39
Invertase, from *Aspergillus niger*, purification and characterization of, 80
Iron deprivation, effect on siderophore production and outer membrane proteins of *Madurella mycetomatis*, 220

Lactate dehydrogenase, from *Flavobacterium* species, electrophoretic patterns of, 351
Lactobacillus hilgardii, effect of organic acid on histidine decarboxylase production by, 15
Lactobacillus species, differentiated by RAPD–PCR, 114
Lactococcus lactis subsp. *cremoris*, 16S–23S and 23S–5S intergenic spacer regions of, 270
Legionella pneumophila, heat shock proteins of, 332
Leuconostoc mesenteroides mutants, rapid screening for high alternan-to-dextran ratio in, 19
Leuconostoc mesenteroides subsp. *cernoris*, purification and characterization of catabolic α-acetolactate synthase from, 316
Lipase, of *Aeromonas hydrophila* showing nonhemolytic phospholipase C activity, 28

Madurella mycetomatis, effect of iron deprivation on siderophore production and outer membrane protein synthesis of, 220
L-Malate dehydrogenase, from *Flavobacterium* species, electrophoretic patterns of, 351
L-Malic acid, effect on histidine decarboxylase production by *Lactobacillus hilgardii*, 15
Methanosarcina mazeii, isolated from paddy field soil, characterization of, 34
Mitochondrial biogenesis, in temperature-sensitive cell division cycle mutants of *S. cerevisiae*, 327
Mixotrophic acetogenesis, from CO_2–syringate reduction, H_2 as energy source for, 245
Monoclonal antibodies, surface antigen analysis of group B *Neisseria meningitidis* outer membrane by, 146
Mucor rouxii, environmental and developmental regulation of carotenogenesis in, 141
Mutagenesis, of *Campylobacter coli* with integrational plasmid vectors, 92

NAD–GDH activity, effect of substrate type used for *A. bisporus* growth on, 345
NADP–GDH activity, effect of substrate type used for *A. bisporus* growth on, 345
Neisseria meningitidis outer membrane, surface antigen analysis of, by monoclonal antibodies, 146
Neocallimastix frontalis, location of glycosidases and xylanase in, 224
Neocallimastix frontalis MCH3, effect of live *S. cerevisiae* on zoospore, germination, growth, and cellulolytic activity of, 201
Neuraminidase, extracellular, *Pasteurella* species isolate production of, 312
Neuraminidase gene, *Bacteroides fragilis* detection by PCR amplification of, 215
Nitrogen dioxide ions, regulation of efflux in *Nostoc* MAC, 119
Nitrogenase activity, of *Cyanothece* sp. BH68K mutants, analysis of, 174
Nocardia asteroides, purification and properties of glutamine synthetase from, 193
Nostoc MAC, NO_2^- efflux and regulation in, 119
Nostoc sp. strain PCC 73102, immunological characterization of hydrogenases in, 102

O-demethylation, from CO_2–syringate reduction, H_2 as energy source for, 245
Oleic acid, transformed by *Sphingobacterium thalpophilum* and *Bacillus cereus*, 62
Outer membrane protein F, of *P. aeruginosa*, surface-exposed linear B-cell epitopes of, 279

Pasteurella species isolates, extracellular neuraminidase production by, 312
PCR amplification, of *Bacteroides fragilis* neuraminidase gene, 215
PCR detection, of *Xylella fastidiosa* strains causing citrus variegated chlorosis, 377
Phospholipase C activity, *apl*-1 gene of *Aeromonas hydrophila* encoding, 28
Photoreactivation, of UV-induced DNA damage in genus *Bacillus*, 361
Piromyces communis OTS1, chitinolytic activity of, 206
Piromyces rhizinflata, location of glycosidases and xylanase in, 224
Plasmid-borne resistance determinants, from *Staphylococcus aureus*, transfer of, 71
Plasmid pJB5JI, behavior in wild-type and symbiotic *Rhizobium huakuii* strains, 97
Plasmid vectors, integrational, mutagenesis of *Campylobacter coli* chromosome with, 92
Plasmids, distribution and homology of, in *Cyanothece* species isolates, 169
Protein profiles, from SDS–PAGE, halophilic bacteria grouped by, 158
Proteinase, extracellular, of *Pseudomonas fragi*, ELISA detection of, 180
Pseudomonas aeruginosa
identification of surface-exposed, linear B-cell epitopes in outer membrane protein F of, 279
role of reactive oxygen species generated by white blood cells in killing of, 124
Pseudomonas fragi, ELISA detection of extracellular proteinase of, 180

Random amplified polymorphic DNA (RAPD)–PCR
Lactobacillus species differentiated by, 114
genetic relationships among *Xylella fastidiosa* strains from, 134
Xylella fastidiosa causing citrus variegated chlorosis detected by, 377
Rapid screening method, of *Leuconostoc mesenteroides* mutants for high alternan-to-dextran ratio, 19
Reactive oxygen species (ROS), generated by human white blood cells in killing *Pseudomonas aeruginosa*, 124
Rhizobium huakuii, behavior of plasmid pJB5JI in, 97
16s rRNA probes, differentiation of ruminal and human *Streptococcus bovis* strains by, 294

Saccharomyces cerevisiae
ABF1 transcriptional control of *ADH1* gene of, 163
decreased mitochondrial biogenesis in temperature-sensitive cell division cycle mutants of, 327
effect on zoospore, germination, growth, and cellulolytic activity of *Neocallimastix frontalis* MCH3, 201
Salinity, effect on halophilic bacteria susceptibility to antimicrobials, 365
SDS–PAGE, grouping of halophilic bacteria using protein profiles from, 158
Sedoheptulose-1,7-bisphosphatase, encoded by *cbbF* genes from *Alcaligenes eutrophus*, 55
90k Serine protease, purification and characterization of, from *Bacillus subtilis (natto)* strain No. 16, 340
Siderophores, produced by *Streptomyces* strains, comparison of, 129
Singlet oxygen, photooxidative damage to *Spirulina platensis* mediated by, 44
Soluble cell protein patterns, differentiation of *Carnobacterium* spp. by, 77
Sphingobacterium thalpophilum, oleic acid transformations by strains of, 62
Sphingomonas paucimobilis-GS1, nutritional requirements for exopolysaccharide production of, 234
Spiramycin, glycerol effect on *Streptomyces ambofaciens* production of, 304
Spirulina platensis, role of singlet oxygen in photooxidative damage to, 44
ssp genes, role in spore osmotolerance of *B. thuringiensis* and *B. sphaericus*, 228
Staphylococcus aureus isolate, transfer of plasmid-borne resistance from, 71
Strain TMA, isolated from paddy field soil and identified as *Methanosarcina mazeii*, 34
Streptococcus bovis strains, ruminal and human, differentiated by DNA homology and 16s rRNA probes, 294
Streptococcus pneumoniae, identification, cloning, and sequencing of DNA essential for encapsulation of, 251
Streptococcus salivarius, 16S–23S and 23S–5S intergenic spacer regions of, 270
Streptococcus thermophilus, 16S–23S intergenic spacer region of, 270
Streptomyces ambofaciens, glycerol effect on spiramycin production and valine catabolism in, 304
Streptomyces aureofaciens, effect of benzyl thiocyanate on tetracycline production by, 84
Streptomyces species, comparison of siderophores produced by, 129
Surface proteins, of *Yersinia enterocolitica*, effect of culture medium on expression of, 372
Synechococcus sp. strain PCC 7002, salinity-dependent copy number change of endogenous plasmids in, 357
Synthetic peptides, epitopes in outer membrane protein F of *P. aeruginosa* identified using, 279

Temperature-sensitive cell division cycle (cdc) G1 mutants, of *S. cerevisiae*, mitochondrial biosynthesis in, 327
Tetracycline, protein profiles of *Streptomyces aureofaciens* producing, 84
Thermoanaerobacter genus, peptide and amino acid oxidation in presence of thiosulfate by, 152
Thermococcus species, isolation and characterization of thermophilic archaebacteria related to, 186
Thiobacillus ferrooxidans strains, heat and cold shock responses in, 10
Thiosulfate, role in peptide and amino acid oxidation by *Thermoanaerobacter* genus members, 152

Valine, glycerol effect on *Streptomyces ambofaciens* catabolism of, 304

White blood cells, role of reactive oxygen species generated by in killing *Pseudomonas aeruginosa*, 124

Xylanase, in anaerobic gut fungi, location by fluorescence microscopy of, 224
Xylella fastidiosa strains
causing citrus variegated chlorosis, PCR detection of, 377
RAPD–PCR used to determine genetic relationships among, 134
D-Xylose utilization, by *Candida guilliermondii* cells, catabolite repression of, 239

Yersinia enterocolitica, influence of culture medium on expression of surface polypeptides of, 372
